SUMMARY

Software Engineer with 1+ year of experience in backend development and data engineering. Strong in Data Structures & Algorithms (LeetCode **2100+**), SQL optimization, and building scalable REST APIs using Java/Spring Boot and PostgreSQL.

TECHNICAL SKILLS

Languages: Java, C++, SQL, JavaScript

Backend: Spring Boot, Hibernate, REST APIs, JWT Auth

Databases: PostgreSQL, MySQL

Frontend: React.js

Tools: Git, GitHub, Android Studio, VS Code

Core CS: DSA, OOP, DBMS, OS, SDLC, Agile

EXPERIENCE

System Engineer

Tata Consultancy Services (TCS)

Apr 2025 – Present

Kolkata, India

- Built scalable backend workflows for a U.S. healthcare client supporting cloud migration, improving overall system performance by **25%**.
- Developed and automated **20+ production pipelines** using **Python + Databricks**, reducing manual operations by **40%** and improving reliability.
- Optimized complex **SQL queries and schema design**, improving batch processing efficiency by **25%+** across high-volume datasets.
- Integrated and deployed **Reference Data Models (RDM)** into **Reltio MDM** via Databricks, improving consistency across enterprise master datasets.

Java Developer Intern

AIXTOR Technologies

Dec 2023 – Jun 2024

Ahmedabad, India

- Developed and deployed **8 HRMS modules** in **1.5 months** using **Java, Spring Boot, Hibernate, JSP, and MySQL**.
- Wrote optimized **custom SQL queries** and applied indexing strategies, improving query response time by **20%**.
- Designed schemas for **4 modules**, reducing redundancy and improving database maintainability by **15–20%**.

PROJECTS

AI Task Management System

[Live](#) [GitHub](#)

- Built a full-stack task management platform using **Java, Spring Boot, Hibernate, PostgreSQL** with REST APIs for Users and Tasks.
- Implemented **pagination, search, filtering (status/priority), overdue detection**, and analytics dashboard endpoints.
- Designed DTO-based API responses with validation and **global exception handling**, improving API consistency and maintainability.
- Integrated an **AI-based priority prediction module** to auto-classify tasks and reduce manual priority assignment.

Medical Assistant (OpenAI-powered)

[GitHub](#)

- Built an AI-based medical assistant using the **OpenAI API** to generate medicine suggestions from symptom summaries.
- users can find doctors near them and some health articles which helps them to improve their daily live routine.
- Designed prompt-driven response flow with structured outputs for safer, consistent AI responses.

ACHIEVEMENTS

- Awarded the **On the Spot (Team) Award** at **Mphasis** for outstanding contribution and commitment to organizational goals (May 2026). ([Document](#))
- **LeetCode Max Rating: 2100+** ([Profile](#))
- Secured **Global Rank 374** among **28,000+** participants in LeetCode Weekly Contest 452.
- Vadodara Police Hackathon: **Incubation Support + 3rd Runner-Up** among **50+ teams** ([Document](#)).

EDUCATION

Bachelor of Computer Science, Parul University

Jun 2020 – Jul 2024
